

Senior Manager - Digital Innovation and Strategy

Dan is the Senior Manager of the Digital Innovation and Strategy group at Ontario Power Generation (OPG) -- a group mandated to help understand and investigate various technologies, drive business value through innovation and efficiency, enable all things digital, and ready OPG for the future. Dan has helped lead the creation of OPG's Enterprise Data Strategy, AI Strategy and is currently focused on building out an AI Center of Excellence in order to enable various usecases throughout the business. Other initiatives within the portfolio include AR/VR/XR, platforms for 3D modelling and data capture, IoT, Edge computing, helping better the worker experience, and robotics.
