

After graduating from Queens with a Computer Science degree, Laura Brooks has spent her career focused on Nuclear and Digital Innovation. As a leader in the Digital Innovation and Strategy group at OPG, Laura initiatives include building out OPG's Enterprise Artificial Intelligence Strategy, AI projects including working to automatically assign a Radiation Exposure Permit (REP) to a Work Order Task using historical data, utilizing the Agile framework to drive business value, and helping the adoption of technology to make everyone's work life easier. In Laura's spare time, she enjoys traveling, baking and [winning at] Nintendo Switch.
