

Sean Scicluna

Sean is currently a Senior Information Systems Specialist at OPG (Ontario Power Generation) supporting CIO's Digital Innovation and Strategy organization as the co-lead for OPG's Enterprise Artificial Intelligence Strategy. He has 17 years of experience at OPG Nuclear specifically in the areas of Design Engineering, Configuration Management and Human Performance, where he was heavily involved in innovation and modernizing work practices through automation and augmentation, to support OPG's pursuit toward a culture of continuous improvement. He continues this culture practice in his current role, while promoting and building an innovative culture on STEM (Science, Technology, Engineering, Mathematics) at OPG.
